

OpenDataDetector

Simulation, $t\bar{t}$, $\langle\mu\rangle = 200$

Normalised tracks

- naive $d_0 = z_0 = 0$ (beamspot only) ($\sigma = 11.8 \mu\text{m}$)
- track fit (no beamspt) ($\sigma = 39.3 \mu\text{m}$)
- track fit + beamspt ($\sigma = 11.2 \mu\text{m}$)
